small and medium volumes

JENSEN Tumbler Dryers

Minimum footprint,
maximum performance

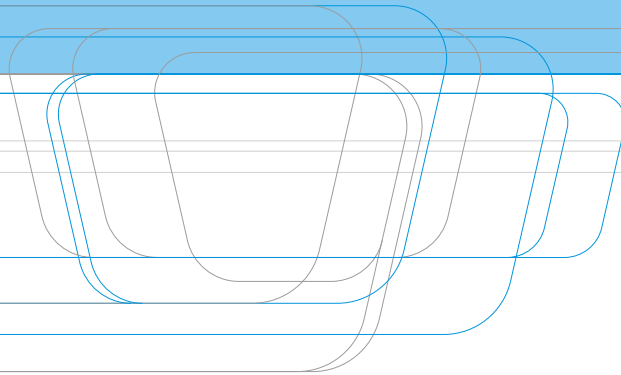

Fast loading and unloading with wide hatch, sliding doors

Easy lint removal with the easy-to-access air filters

JENSEN Tumbler Dryers

Minimum footprint,
maximum performance

Stand-alone operation

Heavy-duty laundries process the large volumes of linen predominantly in a highly automated washroom section. End-customers often have linen that for various reasons cannot be washed nor dried in these machines. Delicate linen as well as contaminated pieces that can be infectious, need to be processed separately. For handling reasons, nursing homes may want to process their guests's private garments in a process that is separate from the rental linen.

The JENSEN tumbler dryers are a perfect complement to increase the laundry's flexibility towards their end-customers, and offer the best solution to their users of the linen. They are best combined with the JENSEN washer extractors that are available with the same loads.

Remote awareness and user-friendly diagnostics function:
Instant overview of machine status with the smart indicator light.

Space-saving and service-friendly:
The new JTD dryers set new benchmarks.

Flexibility in volumes

With a range of four different load sizes, the JENSEN tumble dryers can meet individual requirements. Volumes can be easily adapted when the business grows. The JENSEN tumble dryers (JTD) can process volumes of 20 / 45, 40 / 90, 60 / 130 or 110 / 250 kg resp. lbs each.

Resources saving design

The compact dimensions allow a placement in very tight spaces. This saves room for other operations.

JENSEN Tumbler Dryers JTD 20/45, JTD 40/90, JTD 60/130 and JTD 110/250

Minimum footprint, maximum performance

The fully insulated machine with a reversing drum makes efficient use of heating: More heat

is transferred to the drying process by the specially designed large transfer and steam coils. An ingenious cooldown-process makes sure that no energy is wasted. Wide hatch, sliding doors enable a fast loading and unloading. Thanks to the high volume filter, the tumble dryers can produce with no interruptions, making it a high-performer.

The JTD range can be heated with gas, steam or electricity.

Ergonomic, easy and safe operation
Lint can be easily removed with the easy-to-access air filters. Even from a distance, operators get an instant overview of the machine status with the smart indicator light. The easy-access hinged doors and the visible pulley facilitate instant preventive maintenance. Safety aspects have been paid close attention to with a fire suppression sprinkler system on all gas-heated dryers.

High quality materials for an outstanding Return-on-Investment

The stainless steel drum is a standard. On top of that, all components in the JENSEN tumble dryers are galvanized and ensure a long lifetime. The well-thought-out design and the use of advanced materials ensure longevity and a cost-efficient operation. The availability of the JTD range is maximized, making it a high-performer in the washroom area for small to medium volumes.

Ready for finishing

The humidity sensor ensures the perfect humidity for all linen that needs to be ironed, thus ensuring a perfect finishing touch.

Perfect match

Available in load sizes of 20 / 45, 40 / 90, 60 / 130 or 110 / 250 kg resp. lbs, the JENSEN tumbler dryers are best combined with the JENSEN washer extractors.

The JWE and JTD models operate smoothly all day, satisfying intense requirements of successful laundries. They have all been designed and built with one vision in mind: to increase the operational efficiency and success of the laundries.

Installation

JENSEN is pleased to assist you in planning your laundry providing excellent consulting, layouts and technical data. Authorized JENSEN distributors or JENSEN engineers should carry out the installation to ensure the correct performance.

Service

In addition, JENSEN provides an extraordinary after sales service through a worldwide network of highly qualified Sales and Service Centers and distributors, all with their own maintenance and spare parts services.
