Vacuum Packers

Mobile Vacuum Packer with HACCP Label
Printer - 20 m³/h

600050 (EVP45FNXT)

Mobile vacuum packer
20m³/h with printer

Short Form Specification

Item No.

Floor standing model on wheels with integrated HACCP printer to print vacuum certification labels. Constructed in 304 AISI stainless steel. Domed transparent Plexiglas lid. Pressure chamber with rounded corners. Advanced control panel to set parameters for 10 available cycles and to program technical and maintenance operations. Liquid crystal display shows packaging process information per cycle. Packaging cycle can be set by simply selecting the category and sub-category of product to be sealed. Pulse function to easily program cycles, select functions and parameters. Additional advanced functions: external vacuum, electronic soft air, liquid time (to vacuum pack liquids) and infusion cycle (to speed up marination process). "Soft air" device allows the controlled re-admission of air into the chamber. Check-up function runs a preliminary diagnosis of machine and detects any technical errors before handling the machine. Maintenance operations can be easily performed without dismantling the chamber. CP-conditioning program can be used to remove liquid or oil residues from the pump tank (recommended after long periods of inactivity). Adapter for vacuum packing in external containers (optional accessory). Sealing bar length 450mm.

Main Features

- Free-standing appliance mounted on 4 castors.
- Vacuum traceability on packet: HACCP printer prints vacuum certification labels to be placed on individual packs, thus facilitating final storage operations.
- Advanced, user-friendly control panel, available in 5 languages, which quickly sets parameters for the 10 available cycles and programs the technical and maintenance operations.
- LCD display provides detailed packaging process information for each cycle.
- Packer automatically seals the product according to suggested/set values when packaging cycle is set through selection of product category and sub-category.
- Pulse function to easily program cycles, select pre-set stored functions and parameters.
- Additional advanced functions: external vacuum, soft air, condition program, auto seal program and sealing.
- Check-up function on display runs a preliminary diagnosis of the machine to detect any technical errors before handling.
- "Soft air" device allowing to control the re-admission of air into the chamber.
- Model complies with international hygiene and cleanability standards.
- Can be equipped with an adapter (available as optional accessory), allowing the vacuum process to take place in external containers or appliances by connecting the external container's pipe to the air sucking valve.

Construction

- Simple maintenance operations (oil changing and shock absorber substitution) can be easily performed without dismantling the chamber.
- Liquid or oil residues can be removed from the pump tank using the CP-conditioning program (recommended after long periods of machine inactivity).
- Entirely constructed in 304 AISI stainless steel.
- Unit to have a domed transparent Plexiglass lid.
- Pressure chamber with rounded corners.

Optional Accessories

- Kit adapter for external vacuum PNC packing. Only for 6, 8, 10 and 20 m³/h vacuum packers 650008 □
- Inclined filling table to vacuum PNC pack liquids for 20 m³/h vacuum packers 650010 □
